Southend, Essex and Thurrock Children and Adolescent Mental Health Service

We welcome all referrals from children and young people.

Thank you for completing this form and providing information to support Southend, Essex and Thurrock Children and Adolescent Mental Health Service.

This information will be screened, triaged and reviewed by the Single Point of Access team (SPA) mental health practitioners. This form is designed so that any person can request support and advice when concerned about mental health. The parent/young person must be aware of the completion of this form and consent to this.

When needed SPA mental health practitioners will contact the child/young person/family or carer to gather additional information which will then clarify next steps. Based on the available information and the SPA knowledge of support and resources available within Southend, Essex and Thurrock, a decision can be made to identify appropriate responses to meet individual need.

In the first instance SET-CAMHS are looking to promote the use of early intervention services, which may include psychoeducation, talking therapies, mentoring or support as recommended within the National Institute of Clinical Excellence Guidelines. There are a variety of local resources available external to SET-CAMHS which provide a range of supportive interventions which may be recommended following triage. This support includes digital and online resources for example websites and Apps. These are freely available and maybe accessed via the NELFT SET-CAMHS web resource at: https://mindfresh.nelft.nhs.uk/

Looked After Children

When this involves a Looked After Child the SPA will need to discuss the options with the social worker and arrange a consultation between the social worker and SET-CAMHS within ten working days. To achieve this the SPA will need to have an immediate phone conversation with the social worker to arrange the date, place and time of the consultation. When schools, GPs or foster carers make a referral please ensure consent and accurate contact information for a Social Worker is included. Please be aware that children/young people who are accommodated under section 20 Children's Act will require parental consent.

If a Looked After Child is over 16, SPA will contact a young person and discuss confidentiality and agree consent to involve a social worker. If no consent is given then the young person may be seen alone.

The SPA conversation with a social worker will involve assessing risk and considering signposting options to meet needs. Social workers, where possible, should discuss the case with the local authority mental health coordinator/advisor prior to referring. The mental health advisor may also attend the consultation. At the consultation it is important that all relevant information and history will be available.

Should an Out of Area LAC consultation slot be required, social workers to be advised that if treatment is to be provided, funding will be required.

Prior to the meeting a letter will be sent to request documents be sent to SET-CAMHS for reference at the consultation. Documents would be relevant to chronology and, any paediatric or psychological assessments. These documents are key to being able to provide a thorough consultation.

Please check out these additional resources:

The MindEd website, is a helpful and informative resource for young people, families and carers. It is
accredited by the NHS Information Standard. Provides safe and reliable advice about young people's
mental health, it was created by experts and parents together
