

Weekly Learning Letter

Year Two

Week commencing 13.7.26

Foundation Subjects

The children were sensational in their leaver's assembly on Thursday. They all spoke so confidently, and it was a joy to celebrate their three years in the infant school. We hope it brought back lots of happy memories for you all, too!

In science, the children concluded their unit on animals and their habitats. The children learnt about threats to microhabitats, and then designed wildlife gardens that would encourage wildlife to thrive.

English

The children completed a poetry unit inspired by the poem *The Moon* by Robert Louis Stevenson. The children performed the poem and created illustrations inspired by it. They then had a go at writing two of their own poems about the moon, focusing on using adjectives and similes in the style of Robert Louis Stephenson.

Maths

This week, the children concluded their unit on mass, capacity and temperature. The children applied their knowledge of capacity and volume to answer word problems. They then learnt how to measure temperature in degrees Celsius.

Homework

1. Take part in the summer reading challenge.
2. Practise your 2, 5 and 10 times tables on Times Table Rock Stars or Hit the Button. If you are confident with these, you can start to learn your 3, 4 and 8 times tables ready for Year 3! We would also recommend making sure that your child is confident in their 2, 5 and 10 division facts as these will aid their Year 3 maths greatly.
